CT Made Easy

The Asteion VP marks the entry level of the famous Toshiba A-series. Also the Asteion VP uses Toshiba proprietary imaging technology to optimize image quality. The system can be extended with a large range of options to make it exactly fit to virtually every departmental need. The Asteion VP is your reliable partner for routine CT scanning.

Designed for:

- High image quality
 - 0.45 mm high contrast resolution
 - 2.5 mm at 2.5 HU low contrast resolution
- High patient throughput
 - Maximum helical scan time of 100 s**
 - Maximum reconstruction speed of 1 i/s*
- Easy to use guided mode
- Low patient dose

Key features:

- 0.8 mm slice thickness for high resolution imaging
- Quantum detector material with highest sensitivity for best low contrast resolution
- Up to 0.75 sec/rotation* for fast scanning

Choice of X-ray tubes

Standard, 2 MHU X-ray tube

Powerful, 3.5 MHU* X-ray tube

Intuitive scanning with Guided Mode

FlashStart*, patient optimised contrast guided scanning

FlashView - CT viewing during helical scanning

^{SURE}Exposure, advanced body contour dose reduction technology

**Quantum Denoising Software, dramatically reducing exposure dose,
while maintaining image quality**

*** Option**

**** Option requires 3.5 MHU X-ray tube**
