Brilliance CT - Big Bore Oncology

Configuration

- Therapy planning table top
- 8.0 MHU MRC X-ray tube
- 16 x 0.75mm isotropic imaging
- True 3-D cone beam reconstruction
- Dual monitor configuration
- Oncology specific protocols

Features and Benefits

- 85cm bore size to accommodate patients in immobilization devices or with bulky patient monitoring devices.
- 60cm true Scan Field of View (SFOV) to include all patient skin surface; no compromise when using the scan for radiation dose calculations.
- 16-slice per revolution with 2.4cm coverage allows you to cover larger areas in the fastest time.

- **Oncology specific tools to increase throughput i.e. full length cursor, oncology protocols.**
- **CT L.O.C. (Localization On the Console) increases workflow. ***
- **Respiratory correlated gating with connectivity to third-party gating devices. ***
- **Patient couch assembly to meet accuracy demands of oncology departments.**
