Hispeed CTE (single slice)

Features THEN, HiSpeed CT/e technology will perform the following functions automatically

Scan SmartBreath - Instruct patient when to breath (patient breathing lights). Prospective Multi-Reconstruction - Reconstruct up to three algorithms (per anatomical selection), and set up to two window level settings for each algorithm, (for up to six different views of the anatomy)...all without technologist interaction. * AutoFilm - Print any of the aforementioned six views to laser camera. * AutoArchive - Archive image data. * AutoTransfer - Transfer information to the workstation. * MEANWHILE, you have the option of using console as a workstation. All without slowing system down!*

*** Each of these features are not only automatic, but are performed simultaneously to the scan, allowing you to focus on patient needs.**

SmartBreath

Protocol Management Pediatric & Adult Protocols 20 Anatomical Region Programmer 300 User-programmable Protocols Top 20 Most Commonly Used Protocols Copy/Paste Protocol Features

**Other Features Patient Scheduling (with link to acquisition protocols)
Trauma Patient Option AutoView - Immediate reconstruction and image
display. Priority key to check last image immediately. * AutoVoice Repeat
Series 1024 Localizer - Scan localization tool.**
