## **HiSpeed NXi**

**Thinner slices. Faster scan times. Better images.**

**Designed to meet the increased demands placed on today's radiology departments. The multi-slice NX/i not only provides excellent diagnostic information but also increases departmental productivity. Here's how:**

**Faster scan and reconstruction time: Multi-slice capability, combined with faster (0.7 sec) rotation speed. Thinner slices: The thinner the slice, the higher the resolution - resulting in excellent image quality and diagnostic confidence. HiSpeed NX/i lets you acquire two thin slices simultaneously in the same time it takes for a conventional single-slice scanner. HiLight image quality. Automated, protocol driven scanning: So flexible, your imagination is the only limit.**

All attempts have been made to ensure accurate data. Medical Imaging Resources, Inc. assumes no responsibility for any unintentional errors or omissions.
