Radiation therapy CT simulation system

The LightSpeed[®] RT16 delivers the power needed for advanced, accurate and productive 16-slice CT imaging for radiation therapy. It's a powerful platform you'll use well into the future to take advantage of breakthrough technologies and applications. With the LightSpeed RT, 16 power means possibilities. Precisely.

Precise imaging: With the RT16's powerful 100-kW* generator and 800 mA* Performix™ X-ray tube, you get exquisite image quality even in large patients.

Precise patient positioning: A generous 80-cm wide bore. A 65-cm display field of view. State-of-the-art patient table design. LightSpeed RT16 gives you the full flexibility and freedom you need to precisely position patients in even the most demanding cases.

All attempts have been made to ensure accurate data. Medical Imaging Resources, Inc. assumes no responsibility for any unintentional errors or omissions.
